

SAMSON SDGs Declaration

ENERGY

For Environmental Friendly Industries

- Contribute to energy saving society by selling high-efficiency boilers and heat-recovery systems
- Contribute to the decarbonized society with the hydrogen boiler development

FOOD

Food Enhancement for People

- Reduce food loss around the world with our Cooking sterilizer
- Contribute to a satisfied food supply chain with our long lasting food technology

ENGINEERING

Safety and Security + α for Customers

- Provide customers a safety and secure value-added maintenance services using ICT based SAMSON network system

FACTORY

Sustainable manufacturing

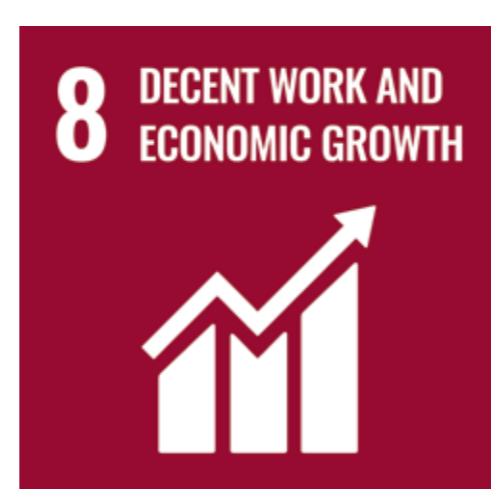

- Build a stable production system through collaboration with suppliers and multi-skilling
- Built labor and energy savings in factories through digital transformation

WORK STYLE

Diverse work styles for employees

- Proactive human resource development and promotion regardless of gender or nationality
- Build a system that allows all employees to balance work and child rearing

HOME TOWN

A community where people can continue to live

- Actively engage in educational activities by hiring local human resources and accepting interns and factory tours
- Actively participate in the local community and contribute to the revitalization of the community
